Today's auctions postponed due to technical problems on the Prisma auction platform

The auctions announced for today had to be postponed due to technical problems caused by the auction platform provider PRISMA. Please see <https://app.prisma-capacity.eu/umm/2783a16f-7b04-4d2f-8f28-419945b199fe> for further information. The technical problems have been rectified by PRISMA in the meantime.

Accordingly, Deutsche Regas will hold the auctions for Auction Packs for 2025/2026/2027 and for individual Terminal Slots for 2025 at a later date. We will provide the exact date and timing in a sperate communication.

Nonetheless bidders can bid for Terminal Slots from today's auction (i.e. Auction Packs for 2025/2026/2027 and individual Terminal Slots for 2025) from this evening onwards on PRISMA at the reserve price of € 0,51/MMBtu until the new auction date.

Above changes do not affect the individual Terminal Slot auctions for 2H 2024 announced for Thursday July 04 2024.
